

Compact Fluid Power Redefined by the Oildyne Cartridge Piston Pump

This Oildyne cartridge pump raises the standard for compact fluid power! This three-piston cartridge pump is an efficient, fixed-displacement pump that provides high performance at a very economical price. Pressure ratings of up to 276 bar (4000 psi), driven speeds of up to 5000 rpm, and the ability to provide a variety of seal types make

this the solution to your unique applications. The uni-directional pump is capable of pumping fluids ranging in viscosity from solvents to thick fluids.

The three-piston cartridge pump maintains the performance and flexibility of the Oildyne five-piston, stand-alone pump while reducing the overall package dimensions.

This ultra-compact piston pump, approximately 33 mm (1.3") in diameter and 51 mm (2") long, is designed to fit into your specially machined manifold allowing for a custom package that fits your space needs.

A variety of displacements can be produced all within the existing physical size. (The internal cam angle determines the displacement.)

Technical Information

Representative Performance Characteristics

Cartridge pump flow at
23°C on DOT 3 brake fluid

Cartridge pump input torque
at 23°C on DOT 3 brake fluid

Cartridge Pump Dimensions

(with sample manifold requirements)

All dimensions in mm (inches)

Specifications

Displacements: .1 cc/rev. (.006 in³/rev.) to
.33 cc/rev. (.020 in³/rev.)

Speeds: Up to 5000 rpm maximum

Pressures: 207 bar (3000 psi) maximum continuous
276 bar (4000 psi) maximum intermittent

Temperature Ranges: Up to 120°C (250°F)

Seals Available: Variety

Fluids Compatibility: Variety
